About Company

Today, companies are in a constant search for a business enterprise that can cater to all their equipment and implement requirements. This helps them save time that is lost when dealing with multiple vendors and in making certain that the quality of their offerings is as per company standards. We Airpro Pneumatics India Private Limited, were established keeping in mind the aforesaid desires of various sectors and are aimed at providing effective solutions for industrial problems.

Since Inception, Airpro Pneumatics India Pvt. Ltd. has been pioneer in latest and affordable industrial tools solution. We offer wide range of solutions to various industries like Automobile, Auto Parts, Aerospace, Appliance, Electronics etc.

Headquartered in Gurugram, Haryana, we have partnered with Japanese and Korean companies to design and manufacture cost effective solutions best suited for Indian manufacturing industries. Addition to that we also have established sustainable and efficient supply chain and distribution of wide range of Industrial tools from worldwide reputed OEMs in India. Our experienced teams are available all over India for sales & support.

Core Strengths:

- 
- ✓ Experienced team of more than 25 Years.
 - ✓ Pan India presence with well qualified engineers.
 - ✓ Extensive inventory to ensure availability of products.
 - ✓ Best price with best support.
 - ✓ Research & Development facility to evolve continuously.
 - ✓ International quality standards.
 - ✓ Ethical business policies and Transparent dealings.
 - ✓ Timely delivery.
 - ✓ Customization facility.
 - ✓ Complete client satisfaction.

Major Brands Available:

ROUGH GRINDING AND CUTTING OFF

Grinders Extreme productivity for cut-off and depressed centre wheels Extreme productivity grinders are suitable for all rough and heavy grinding tasks. Our models are powered by a motor with the latest turbine technology which gives extremely high power to-weight ratios compared to normal vane motors. This means that you can select a lighter, more compact tool without sacrificing the material removal rate. Compared to a vane motor, a turbine motor provides up to 40 percent more efficiency for the same specific job and at the same time reduces the total energy consumption. Our grinders have been optimized to get the highest power-to-weight ratio available for conventional vane motors. They are developed to be durable with low service requirements.

Cutting, bending, and assembling. Shaping metals to perfection includes an extensive range of different techniques. The steady growing business with increasing demand for quality and shorter delivery times require processes and tools that keep delivering, with repeatable quality. From blacksmiths in the days, in today's aerospace and automotive industry to whatever the future brings. From the small details to the big picture.

Choose the best auto parts that fit you.

DIE GRINDING AND DEBURRING

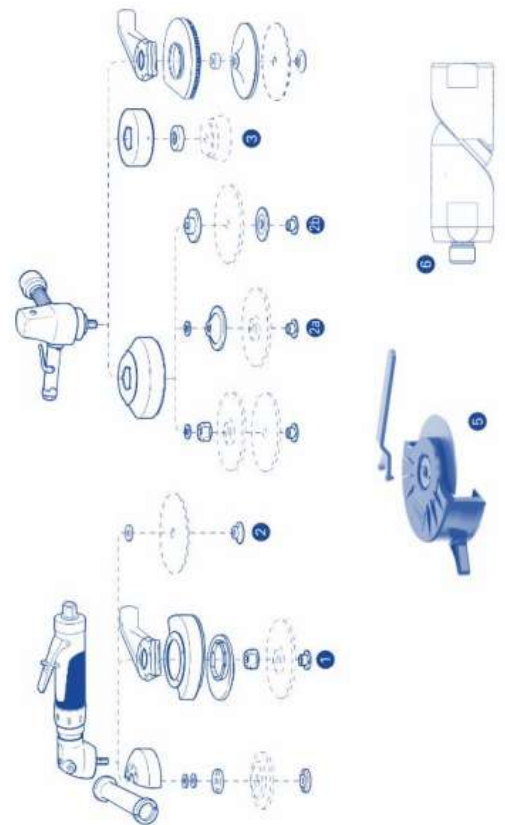

- 1 Carbide burrs
- 2 Mounted points

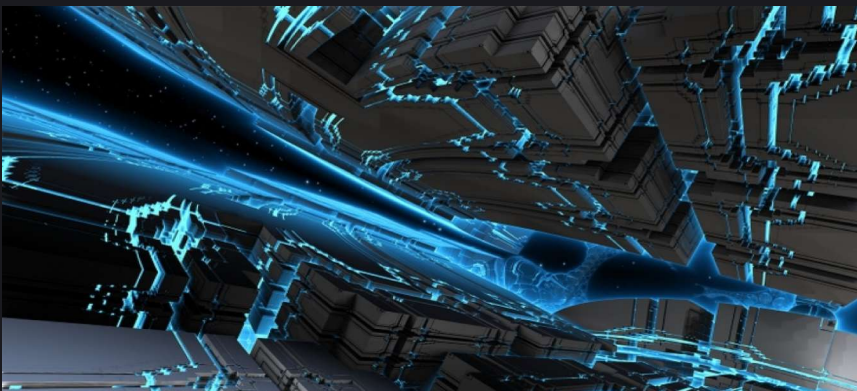

ROUGH GRINDING AND CUTTING OFF

- 3 Depressed center wheels
- 4 Cut off wheels
- 5 Cup wheels
- 6 Flap wheels
- 7 Straight wheels
- 8 Cone wheels

SANDING AND POLISHING

- 9 Fibre discs
- 10 Wire brushes
- 11 Polishing bonnets
- 12 Radial flap wheels
- 13 Scotch-Brite

DIE GRINDING

AIRPRO die grinders are available in straight or angle versions in a wide range of sizes and power outputs. All the tools fulfil the highest standards and requirements in terms of ergonomics, accessibility and productivity. Like all AIRPRO tools, they are easy to work with and built to last. Die grinders are an excellent choice for high quality finishing and surface preparation in applications where accessibility is your first priority. AIRPRO die grinders are high quality tools with compact, ergonomic designs that offer excellent accessibility. AIRPRO'S straight models, ergonomically designed for operator comfort and equipped with a speed governor for optimum process speed. Our models are available in scatter damping versions, which give improved life length of burrs and reduce vibrations for the operator. Our angle versions with the same features as the straight models. AIRPRO has a high-speed pencil-type tool for precision grinding and polishing.

Only for LSF/LSV12

SANDING AND POLISHING

AIRPRO handheld sanders are available in a range of different versions for all type of jobs From extreme productivity sending to fine grit sanding for the finest possible surface finish Our sanders are suitable for use with all types of abrasives from dry sanding to wet sanding, from paper to wire brushes and polishing with Velcro pads or lambswool. We also offer belt sanders in our range. Our tools have user-friendly ergonomic designs with high power-to weight ratios, an auto balancer that reduces vibrations and good accessibility to the workpiece The range includes sanders equipped with dust extraction to lower the operator's exposure to dust. Over the years, eX Digital, Inc. has proven itself to be a highly reliable provider of efficient, convenient, and user friendly software. It is very important that the software be able to meet the most basic software requirements for even beginner users and we couldn't be more proud of what we have managed to come up with this year.

WELD FLUX, PAINT AND RUST REMOVAL

AIRPRO scalers are ideal for all weld flux, paint and rust removal tasks in foundries, shipyards, weld shops and construction sites. Our range includes vibration damped models, which reduce the operator's exposure to vibrations. Scalers AIRPRO robust, all steel scalers are designed to work in the toughest environments. The tools are ideal for removal of weld flux, paint and rust, and for light concrete trimming. The needle scaler can handle even the toughest paint and rust removal tasks.

ROUGH CHISELING

AIRPRO robust, all-metal chipping hammers are designed to stand up to the roughest handling and cope with the toughest jobs in foundries, shipyards, off shore installations and other heavy industries. Built-in ergonomic features such as vibration dampening help reduce operator fatigue and protect the operator against long term exposure to vibration.

Fastening Tool

Impact wrenches With easy operation the AIRPRO series are your perfect partner for general assembly and tackling the toughest industrial jobs that requires high torque output. These models feature a twin hammer impact mechanism for fast run down with a composite housing for best power-to-weight ratio with four torque settings. Easy one hand operation (Left or right-handed) with button-controlled torque setting (forward/ reverse) with an ergonomic handle with anti-slip rubber grip.

Drilling

AIRPRO's handheld drills are built to provide consistent reliability and performance in a wide range of applications, such as drilling in steel, composites and other materials. The advanced ergonomic designs of the tools make your job easier, safer and more efficient

"What Makes us Unique"

Pan India Presence

Pan India Presence with dealers and service network We have established experienced and qualified dealers and service network all over India and in almost all major industrial areas of the state. We have also started i our regional sales and support office with inventory setup in Hosur, Tamil Nadu for the clients of Southern; states of india. We have dedicated team for support and after sales service.

Infrastructure

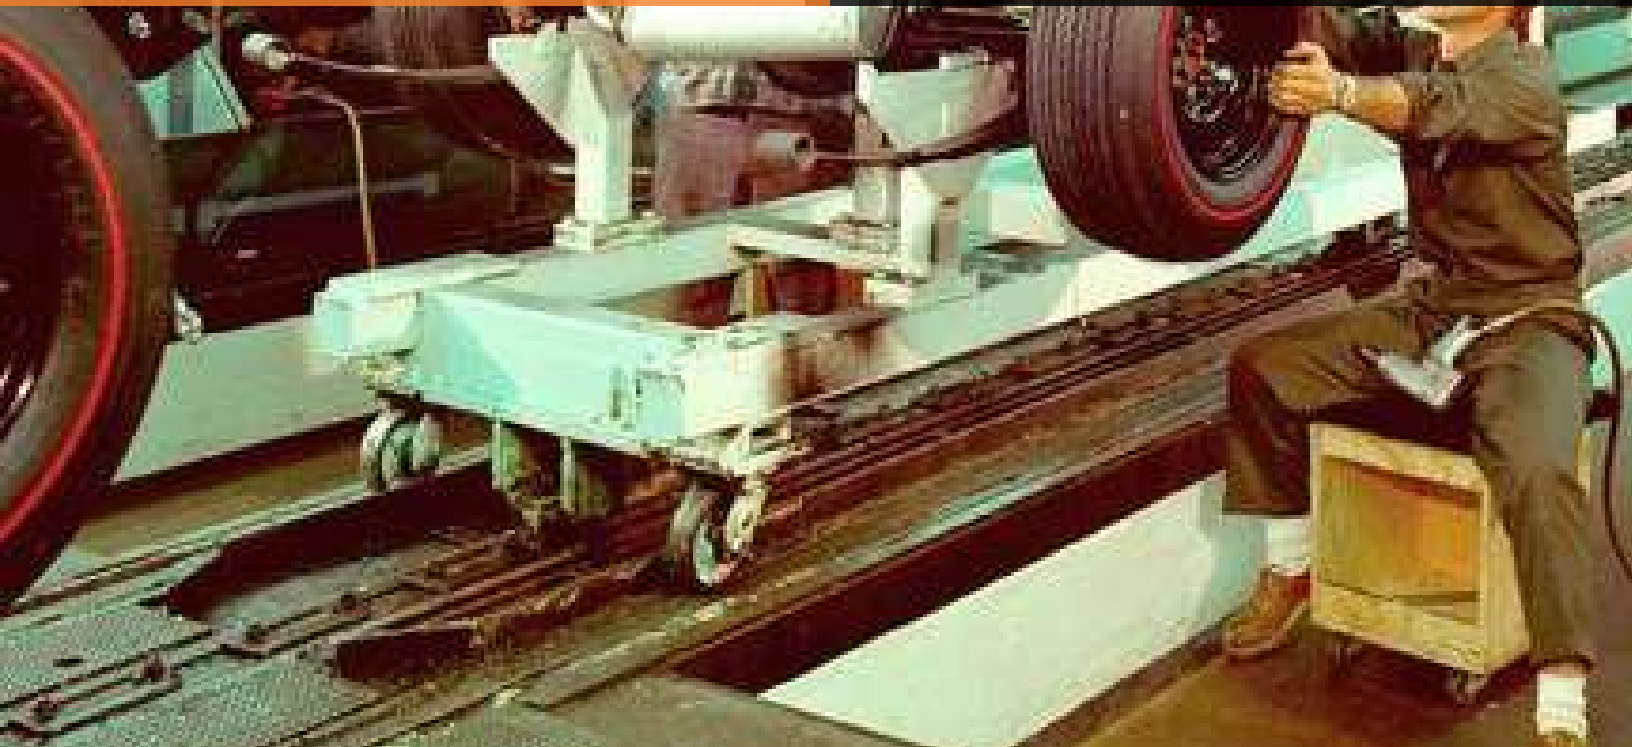

We are backed by a state-of-the-art infrastructure facility that consists of manufacturing, quality, research & development, procurement, warehousing facility, etc. All these units are outfitted with the modern technology and machinery, enabling us to manufacture and supply the products at par with the detailed specifications of our esteemed customers. These units work in close association in order to maintain smooth production and delivery process To fulfill the ever-changing requirements of the industry, time to time, we make necessary changes in our facility

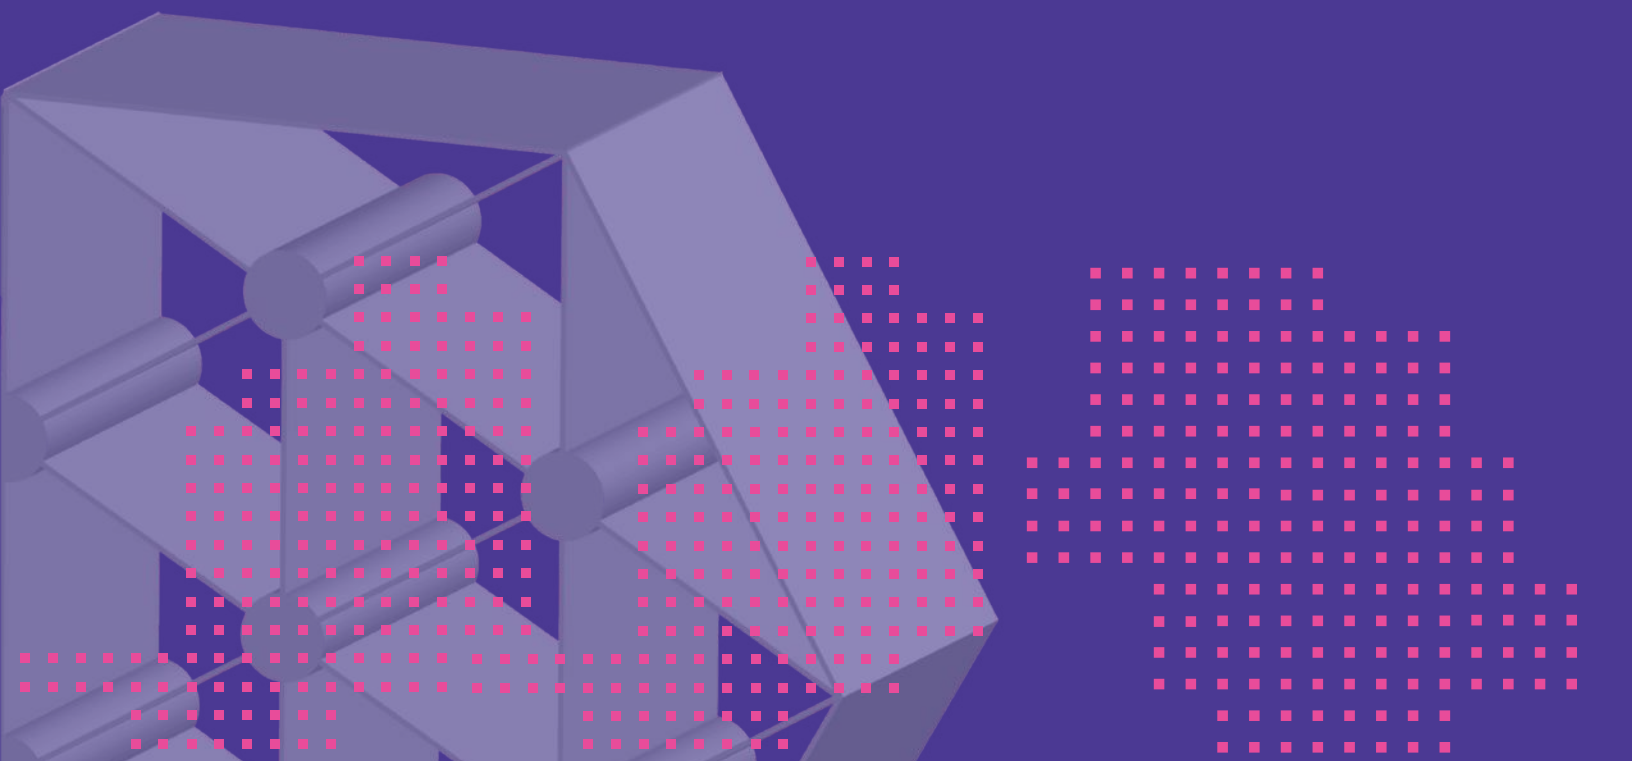

Quality Assurance

As a quality centric organization, our main aim is to offer our precious clients only products that have supreme quality and are perfect in all aspects. In order to manufacture these products, we procure only quality tested raw material from the authentic vendors of the industry. Also, the products that we import are sourced after only ngorous quality assessment. All the finished products are subjected to meticulous quality checks which are conducted by our quality controllers as per the international quality standards.

Corporate Culture

We strive to solve the problem of industries The passion to solve the problems, support our clients with our sustainable solutions and attitude of "do more, serve better" is what serves as foundation of our corporate culture in our organization. We believe in contributing to our customers value creation with our leading edge ideas and solutions
